University Senate Council Chair Report

- A discussion has been initiated at the Senate Council by the Provost (http://www.uky.edu/Faculty/Senate/related_links.htm)
- The discussion:
 - What is the role and nature of centers, institutes and multidisciplinary instructional programs?
 - How do these kinds of educational units and their faculties relate to departments, schools and colleges?

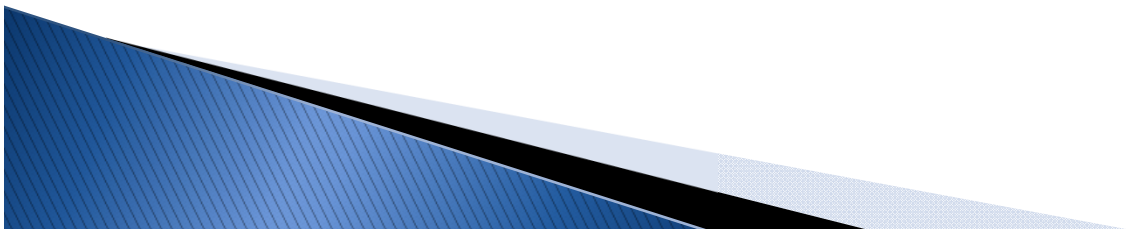

The discussion process:

- Will soon broaden to involve the entire academic university community.
 - All College faculties and their Faculty Councils will be asked for feedback on how these issues may impact their college and the university.
 - At the final stage, all college faculties and Faculty Councils will be asked for their vote to **endorse** any possible changes.
 - Any changes in policy will be presented to the Board of Trustees for final approval.
-

Summary of the LCME Site Survey Findings

November 14-17, 2010

Strengths

- The array of multiple research opportunities available to medical students throughout the curriculum is exemplary.
- The extensive curriculum evaluation and strategic planning process has been used to effectively monitor and improve student learning.

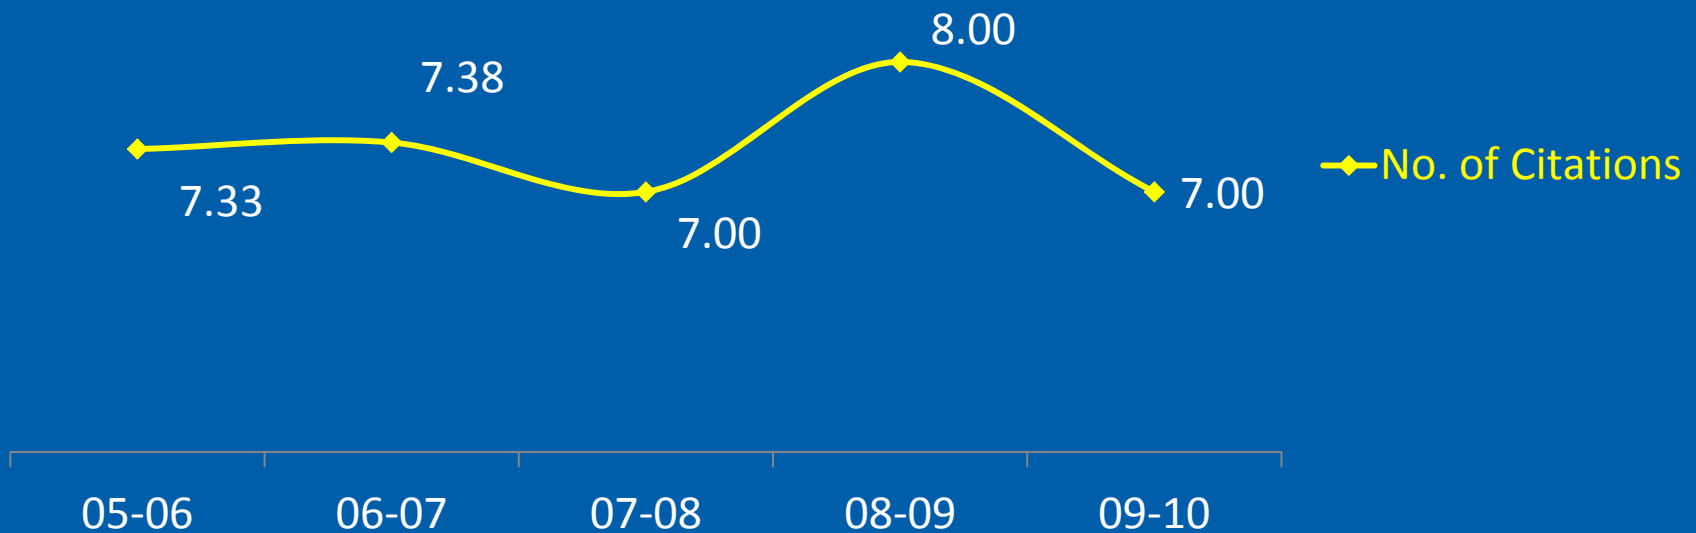

Strengths

- Course directors and the administration are exceptionally responsive to student feedback and concerns.
- There is an extensive array of pipeline programs aimed at increasing diversity in the student body.
- The administrative team is strong and has the support of the faculty.

Strengths

- The financial aid office is held in high regard by the medical students. This office offers a wide range of programs and services that significantly enhance the students' understanding of financial aid matters.
- The basic science and clinical faculty are clearly dedicated to teaching excellence.

Average Number of Citations By Year of Survey Review

* Medical School Preparation for LCME Accreditation, AAMC Annual Meeting, Nov. 2010

Areas of Non-Compliance

- The faculty does not have access to adequate teaching space to conduct optimal small group sessions.
- The affiliation agreement between the medical school and the VA Medical Center does not specify the responsibility for treatment and follow-up when a student is exposed to an environmental hazard.
- There is not a clear understanding among the clinical faculty leadership of the authority and responsibility of the dean regarding medical school matters.

Areas of Transition

- The school is currently conducting a search to appoint a permanent dean.
- Without additional classroom and small group space, the planned increase in class size may be problematic.
- Planning has begun for a reorganization of the curriculum.
- The University of Kentucky is currently conducting a search to appoint a new president.
